Padang, Sumatera Barat

Fresh graduate in Informatics Engineering with interests in web development, data analysis, and technology. Experienced in building web-based systems using PHP and MySQL, with strong problem-solving skills and eagerness to learn new technologies.

WORK EXPERIENCE

Administrative & Finance Staff Intern

Mei 2025 – Juni 2025

Badan Pusat Statistik Provinsi Sumatera Barat

- Managed digital and physical financial document archiving to improve data organization and accessibility.
- Assisted in organizing financial transaction records and administrative reports systematically.
- Supported document distribution and data management processes for BPS offices across West Sumatra.
- Learned the importance of accuracy, responsibility, and structured workflow in managing public data.

EDUCATION

Bachelor of Informatics Engineering

October 2021 – August 2025

Universitas Putra Indonesia YPTK Padang

- GPA: 3.58 / 4.00 (Cum Laude)
- Final Thesis: "Weather Clustering for Rainfall Prediction in Padang City Using K-Means and Naive Bayes Algorithms"
- Developed interest in combining data analysis and software development to solve environmental and real-world problems.

Senior High School – Science Major

July 2017 – May 2020

SMAN 01 Bengkulu Utara

- Active in extracurricular activities including Paskibra, Futsal, and Science Club.
- Served as Vice General Leader of the school futsal team (2019–2020).
- Participated in school social and educational activities through S.A.N.S (School Anti-Drug Task Force).

PROJECTS ACADEMIC

Rainfall Prediction Web System (Final Thesis Bachelor Project)

- Designed and developed a web-based rainfall prediction system using weather data from BMKG Teluk Bayur Padang.
- Built the system using PHP, MySQL, HTML, CSS, JavaScript, and Bootstrap.
- Applied K-Means clustering and Naive Bayes classification to analyze weather patterns and predict rainfall categories.
- Designed system architecture and workflows using UML diagrams.
- Conducted system testing using Blackbox Testing and model evaluation using RapidMiner.
- Through this project, I learned how technology and data can help support environmental analysis and decision making.

Web-Based Decision Support System for Community Aid Selection (Internship Project)

- Developed a web-based Decision Support System (DSS) for selecting aid recipients using the TOPSIS method.
- Implemented automatic ranking and criteria calculation features in an interactive web application.
- Built the system using PHP, MySQL, Bootstrap, and JavaScript.
- Validated calculation results using Python and pandas for data processing.
- Learned how to translate manual decision-making processes into digital systems that are more efficient and transparent.

CERTIFICATIONS

TOEFL Test (Skor 516) – ETC	2025
Web Programing – Cv.Mediatama Web • Developed e-commerce and company profile websites using PHP, Bootstrap, and Laravel. • Built admin dashboards and implemented content management features using TinyMCE.	2025
Intermediate Junior Web Developer – VSGA Digitalent • Applied structured programming and coding best practices. • Learned to utilize reusable libraries and software components effectively.	2025
Fundamental Data Science – FGA Digitalent • Data Scraping • Data Explorations • Data Cleansing • Data Annotation	2025

SKILLS

Technical Skills	PHP, MySQL, HTML, CSS, JavaScript (Basic), Bootstrap, Laravel (Basic), Python (Basic), Microsoft Office, Canva
Soft Skill	Problem Solving, Adaptability, Teamwork, Leadership, Communication, Decision Making
Languages	Indonesian (Fluent) English (Basic)
